SUMMARY

Full-stack engineer (B.E. Computer Science, 2026) who ships AI-agent products to production. Built streaming LLM chat, MCP and REST integrations, and multi-tenant search on Next.js, Node.js, MongoDB and Redis at PulseGen, and scaled a learning platform serving 30K+ daily users at MathonGO. Most comfortable owning a feature end to end: spec, code, tests and deploy. Looking to build developer-facing products used by engineers worldwide.

WORK EXPERIENCE

SDE, PulseGen

(Hyderabad) | Feb 2026 – Present

ARRWIN — AI ASSISTANT FOR PRODUCT MANAGERS

- Built ingestion, **streaming chat**, contradiction detection and tenant-isolated knowledge workflows with Next.js, TypeScript, MongoDB, **Redis Streams**, S3 and **AI agents**.
- Shipped the **Daily Brief** for PMs, integrating Gmail and other connectors via **MCP** and REST APIs; diagnosed auth and permission failures across MongoDB Atlas and OAuth scopes.

PULSEGEN PLATFORM

- Engineered a search pipeline on **AWS** and **MongoDB Atlas** with 3-tier relevance scoring across **400K+ accounts** in a multi-tenant SaaS.
- Designed a 7-level user-adoption tracking system using batch fetching, cron jobs and **MongoDB Change Streams**, cutting database round trips by **~80%**.
- Built RBAC, onboarding, notifications, email workflows, CI/CD and virtualized views rendering **100K+ elements** per page; closed **84** feature and bug tickets with Jest unit and integration tests.

SDE Intern, MathonGO

(Bengaluru) | Jul 2025 – Jan 2026

- Built and optimized Leaderboard and League modules for GetMarks in React with REST APIs, handling **1L+ weekly rank updates** with low-latency UX.
- Led the NEET v2 revamp: refactored data flow, API caching and the rendering pipeline; the release coincided with **3x daily NEET users**.
- Integrated a modular LMS Courses module into GetMarks, serving **30K+ DAUs** at launch.

Co-founder & Full Stack Developer, AiResumate (Capco-cs)

(Remote) | Dec 2024 – May 2025

- Shipped an AI resume platform (Next.js) routing between **Gemini**, **OpenAI GPT** and **Claude** for real-time ATS scoring and rewriting, via serverless REST endpoints.
- Integrated Cashfree payments with zero-downtime Vercel CI/CD; reached **1K+ visitors** and **\$150+ revenue** in month one.

Tech Lead, E-Cell MJCET

(Hyderabad) | Sep 2024 – Jul 2025

- Led a 5-member team building the hackathon platform (Next.js): **500K+ visitors**, **30K users** (440% growth), **127+ registrations/day** at peak.

PROJECTS & RESEARCH

Checkpointed State Management for Tool-Using LLM Agents

Research paper | 2026

- Studied the long-horizon reliability gap in tool-using agents and proposed checkpointed state management; designed the experimental evaluation. With S. S. Ahmed and S. W. Sidiqi.

Hypogen

Multi-agent LLM pipeline

- Built a multi-role LLM pipeline that answers business questions by generating and running **DuckDB SQL** over business data.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science

Sep 2022 – Aug 2026

- Muffakham Jah College of Engineering and Technology, Hyderabad || **Relevant Coursework:** CS & AI

SKILLS

- Languages:** JavaScript, TypeScript, Python, C++ (DSA & CP), Java, SQL
- Development:** React, Next.js, Node.js, Express, Redux, Tailwind CSS, REST APIs, AI agents, MCP, LLM APIs
- Data & Infra:** MongoDB, PostgreSQL, Redis, DuckDB, Supabase, AWS, Docker, Git, Vercel, CI/CD, Jest, Playwright

AWARDS & CERTIFICATIONS

- #1 College Rank | GeeksforGeeks • MasterBlaze Winner | Coding Ninjas (2024) • 4-Star Coder | GeeksforGeeks**
